PERSONAL PROJECTS

1. USB BYTE

- It is a security device that can protect us from hackers. It provides us anonymity and we can surf the internet without any fear.

2. DARK NET/DARK TOOL

- A console which can check whether the link is active or not and even finds the time from when the link is active in darknet.

3.Strangers

- It is a Web Chatting app we can use to communicate with others. It provides encryption, and a good interface for chatting, sharing files, e.tc.

4.Advanced Vulnerability Scanner

- It scans various vulnerabilities in any website like SQL injection, cross-site scripting, e.tc, and will show us how to patch it.

5. Speech to Text

- An application that converts our speeches to text format customized for police functioning in different Indian Languages

PROGRAMMING LANGUAGES

C, C++, bash, JAVA, Python, Ruby, Perl, JavaScript
